

Introduction to Databases (X-409.1)
Assignment 3 (Due by Class Meeting 5)

For practice in normalization, complete Try This Exercises 6-1 and 6-2 from the textbook. (Solutions are in the textbook, so there is no need to turn in this part of the assignment.)

Create a star schema model for the Computer Books Company database design shown in the solution to Try This 6-2 from the textbook (found in Appendix B beginning at the bottom of page 452). You should have fact tables for book inventory, publisher book purchases, and customer book purchases.
