Introduction to Databases (X-409.1)
Assignment 5 (Due by Class Meeting 7)

Create a physical data model for the medium-sized business schema you created in Assignment 4. Include the following:
- o   Data types for all attributes with NULL or NOT NULL constraint.
- o   Resolution of any supertype/subtype relationships in the logical model (implement as-is, collapse into subtypes only, or rollup into supertype).
- o   A list of any added indexes (beyond the primary key indexes).
